

ORGANIC AGRICULTURE

Text book in English and Russian

The "Organic Agriculture" (OA) book provides anyone interested in this type of farming with a practically focused textbook. The book gives a basic summary of work covering all relevant themes on which the most competent authors, coordinated by Czech experts - Bořivoj Šarapatka and Jiří Urban, provide definitive contributions valid not only within the Czech Republic. The book is recommended for practical farming but also as a textbook for teachers and students. The real value of the book is in the fact that it has been compiled by a number of OA specialists and institutions focusing on this area of agriculture to meet the demand for a comprehensive publication.
